

Result Explanation:

- 1) By implementing the SON algorithm on yelp dataset we could conclude that many users reviewed restaurants in Las Vegas and specifically the pincode - 89119. There are many other pincode as well but majority of them were from this area. Also point to be noticed is that the other places also belonged near to area referred by pincode - 89119 e.g 89109,89118 etc all these pincode belong to same City of Las Vegas in Nevada.
- 2) Secondly the most of the users review about the businesses which were serving the asian cuisine especially Japanese though there were some other american and mexican cuisines but majority belonged to Japanese. From this we can conclude that the most the users may be Japanese or like Japanese Cuisine which included the Noodles, ramen.
- 3) Finally we can conclude that many users reviewed about Japanese cuisine in Las Vegas.
